CERTIFICATION

Developing Soft Skills and Personality   Sep 2022
- enhanced my interpersonal communication, leadership, and emotional intelligence.

Data Analysis using SPSS   Sept 2023
- gained proficiency in statistical techniques and data interpretation for research and analysis.

Client Assessment and Initial Consultation   Oct 2024
- gained experience in conducting intake sessions, building rapport, and case history.

PROFESSIONAL EXPERIENCE

Clinical Psychology Intern, Naveen Hospital   2022
- engaged in observational learning and client interaction, conducting mental status examinations for those with clinical disorders.
- discussed diagnoses and interventions with psychologists.
- deepened my understanding of psychological definitions and disorders.

Clinical Psychology Intern, COMPATHY   2023
- observed and listened to clients, witnessed test administrations, and engaged in discussions regarding provisional/differential diagnoses with interventions.
- attended insightful academic sessions, enriching my understanding and practical skills.

Psychology Intern, Therapyon   2023
- worked with boys and girls aged 5 to 15 years where I provided activities focused on skill development and behavior modification and psychoeducation.
- conducted activities for special children by observing their attention span, emotional regulation, social interactions, and coping mechanisms focusing on learning basic daily activities and academics.

PROJECTS

Perceived stigma, attitudes, and beliefs towards mental illness among mental health experts and the general populace: A comparative study
- completed a quantitative study, sampling 353 individuals using snowball and random techniques.
- Employing IBM software, we analyzed data with the independent sample T test and Pearson's correlation, bridging literature gaps and meeting deadlines adeptly.

AI INDUCED ANXIETY SCALE FOR HEALTHCARE PROFESSIONALS (AI-ASHP) (in progress)

- Conducted a pilot study with 64 samples, incorporating expert opinions from 5 professionals. Split-half reliability, Cronbach's alpha, and item correlation were calculated, resulting in a 10-item questionnaire
